

CRIME
IN
SOUTH
CAROLINA
2011

Compiled and presented as a collaborative project between the State Law Enforcement Division and the South Carolina Department of Public Safety.

INTRODUCTION

The 2011 edition of *Crime in South Carolina* contains general information about crime trends, provides crime data at the county level for the most recent year available, compares national and state crime trends and provides descriptive information about crime. The intent of this publication is to provide statistical information about crime in the state in a simple and straightforward manner so that it can better inform policymakers, criminal justice practitioners and academicians as well as the general public.

The information presented in the tables, graphs and charts in this publication indicate volume, fluctuation and distribution of crime in South Carolina on the basis of incident reports submitted to the State Law Enforcement Division (SLED) by state and local law enforcement agencies. These reports are edited and reviewed, corrected as needed and compiled to form the basis of the information presented in this report. It is important to note that the information in this report is only as complete as the information submitted to SLED. By their very nature, unreported crimes cannot be included. Additionally, edits, updates and corrections are made over a two-year period in order to provide agencies with the maximum window of opportunity to report as fully and accurately as possible. As a result, rates and totals from a specific year can vary from previously published totals for that same year. The data used for this report were current as of December 10, 2012. Any data published here concerning figures for prior years supersede those published in previous reports. The sum of categories for some tables, charts or graphs may not total 100% due to rounding.

We wish to express our thanks and appreciation to the sheriffs, chiefs of police, state and local law enforcement officers as well as the administrative staff whose hard work in gathering and submitting crime and arrest data to the South Carolina Uniform Crime Reporting Program made publication of this report possible. The report itself is the product of a collaborative relationship between the State Law Enforcement Division, Uniform Crime Reporting Program and the South Carolina Department of Public Safety, Office of Highway Safety and Justice Programs Statistical Analysis Center.

DEDICATION

This report is dedicated to all law enforcement officers, and in particular to those who died in the line of duty serving the citizens of South Carolina. The following officers died in the line of duty in 2011:

Corporal Charles R. “Chuck” Nesbitt, Jr. – Sumter Police Department, January 21, 2011.

Deputy Roger D. Rice, Jr. – Laurens County Sheriff’s Office, July 14, 2011.

Master Public Safety Officer E. Scott Richardson – Aiken Department of Public Safety, December 21, 2011.

Information regarding deaths in the line of duty was furnished by the South Carolina Law Enforcement Officers Hall of Fame.

INDEX OFFENSES

There are seven Index I offenses: murder, rape, robbery, aggravated assault, breaking or entering, larceny and motor vehicle theft. These are typically categorized as violent (murder, rape, robbery and aggravated assault) and property (breaking or entering, larceny and motor vehicle theft) and provide basic measures of crime. Throughout this report, crimes are usually presented either as the number of reported offenses, or as the rate of offenses per 10,000 unit of population. Because it takes into account population, the offense rate usually provides the most useful basis of comparison over time or among jurisdictions or other geographical groups. The formula for calculating an offense rate is as follows:

$$\text{Offense Rate} = \frac{\text{Number of Crimes} \times 10,000}{\text{Population}}$$

State and county population estimates used to calculate offense rates were provided by the South Carolina Budget and Control Board, Office of Research and Statistics.

South Carolina's violent crime rate decreased 2.2% from 2010 to 2011. Since 1975 the violent crime rate has increased 16.8%.

VIOLENT CRIME: Violent crime consists of murder, rape, robbery and aggravated assault, and involves the element of personal confrontation between the victim and offender.

South Carolina's murder rate increased 21.1% from 2010 to 2011. The state murder rate has decreased 53.7% since 1975.

MURDER: Murder is the willful killing of one person by another. The classification of this offense is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury or other judicial body. Deaths caused by negligence, suicide, accident or justifiable homicides are not included.

ARRESTS

Arrest counts provide a measure of law enforcement's response to crime. Arrest rates also provide estimates of criminal offenses such as illegal drug use or driving under the influence for which there are no victims who are likely to report the behavior. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community over time. The arrest practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies. But the practices for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. Uniform Crime Reporting procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested, since one person may be arrested several times during the year for the same or different offenses. In this report, arrests are presented either as the actual number of arrests or as arrest rates per 10,000 unit of population. Arrest rates are calculated using the following formula:

$$\text{Arrest Rate} = \frac{\text{Number of Arrests}}{\text{Population}} \times 10,000$$

State and county population estimates used to calculate arrest rates were provided by the South Carolina Budget and Control Board, Office of Research and Statistics. Arrest data are available for the 1976 through 2011 time period, with the exception of arrest data for 2001. Arrest data for 2011 are not available and are not included in any of the data tables or charts that follow.

Clearance rates provide a measure of the degree to which crimes are resolved. This was calculated by dividing the sum of incidents cleared and not cleared, by the number incidents cleared.

South Carolina's violent crime arrest rate decreased 9.1% from 2010 to 2011. From 1976 to 2011, the violent crime arrest rate has decreased 12.7%.

VIOLENT CRIME: Violent crime consists of murder, rape, robbery and aggravated assault, and involves the element of personal confrontation between the victim and offender.

VIOLENT CRIME ARRESTS

JUVENILE ARRESTS

Besides being a gauge of law enforcement's response to crime, arrests provide reliable information concerning the age of apprehended offenders. Consequently, arrest rates by age provide one of the better readily available measures of juvenile delinquency. Uniform Crime Reporting procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. As a result, annual arrest figures do not measure the number of individual juveniles arrested, since one juvenile might be arrested several times during a year. State law sets the age of adult responsibility in most criminal matters at seventeen years of age, so juvenile arrest rates were calculated on the basis of the juvenile (age 0 through 16) population for each year from 1976 through 2011.

$$\text{Juvenile Arrest Rate} = \frac{\text{Number of Juveniles Arrested}}{\text{Juvenile Population}} \times 10,000$$

State population estimates used to identify the 0 through 16 age population group and calculate arrest rates were provided by the South Carolina Budget and Control Board, Office of Research and Statistics. Juvenile arrest data for 2001 are not available, and are not included in any of the data tables or charts that follow.

South Carolina's juvenile arrest rate for violent crimes decreased 26.3% from 2010 to 2011. The juvenile arrest rate for violent crimes has increased 15.5% since 1976.

VIOLENT CRIME: Violent crime consists of murder, rape, robbery and aggravated assault, and involves the element of personal confrontation between the victim and offender.

South Carolina Juvenile Arrest Rate for Violent Crime

Twelve juveniles were arrested for murder in 2011. In 2010 fourteen juveniles were arrested for murder.

MURDER: Murder is the willful killing of one person by another. The classification of this offense is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury or other judicial body. Deaths caused by negligence, suicide, accident or justifiable homicides are not included.

ASSAULTS INVOLVING DOMESTIC/INTIMATE RELATIONSHIPS

This section examines aggravated assault, simple assault and intimidation involving victims and offenders who have either a family or romantic relationship with one another. Family relationships are defined as including the following victim offender relationships: child, stepchild, grandchild, sibling (brother or sister), stepsibling, parent, stepparent, grandparent, in-law, and other family member. Intimate relationships are defined as including the following victim offender relationships: spouse, ex-spouse, boyfriend/girlfriend, and same sex relationships. The victim to offender relationship might best be understood as describing who the victim of the assault was.

There were 3,076 aggravated assaults in 2011 involving victims who had a family relationship with the offender.

AGGRAVATED ASSAULTS INVOLVING FAMILY

Victim Was:	Number	Percent
Child	704	22.9%
Grandchild	47	1.5%
Grandparent	55	1.8%
In-Law	121	3.9%
Other Family Member	694	22.6%
Parent	516	16.8%
Sibling (Brother or Sister)	690	22.4%
Stepchild	132	4.3%
Stepparent	99	3.2%
Stepsibling	18	0.6%
Total	3,076	100.0%

Family Aggravated Assault 2011

There were 11,431 simple assaults in 2011 involving victims who had a family relationship with the offender.

SIMPLE ASSAULTS INVOLVING FAMILY

Victim Was:	Number	Percent
Child	2,083	18.2%
Grandchild	134	1.2%

Note: SLED works closely with law enforcement agencies throughout the year to facilitate timely and accurate data submissions. Nonetheless, jurisdictions sometime experience technical issues that affect annual totals and may be reflected in these data tables. SLED continues to add and correct data which may alter the totals presented in this report for future reports.
